THE CITY AUTHORITIES.—We have no power with them to inflict any punishment by the Anti-Slavery paper in this city, but the Mayor and police for alleged neglect of duty on the day of the election. The world is left to suppose, that on that day, Louisville had no Mayor and no police, that the police force of the city, Mayor and all, had actually fled from their posts of duty, abandoned office, and given up the city to violence and blood. Among many similar complaints, copied into the papers, comes this from a man who had been lately published, is the following, purporting to be taken by the Louisville Courier from the Sandusky Daily Register:

Whatever the judgment of the country may be as to the responsibility for the terrible scenes of May, 1861, we Americans of foreign birth, we think, can have little difference of opinion on our point, viz: that the civil authorities of Louisville behaved in the most cowardly and treacherous manner in the preservation of the peace, of which any account is given, was that of Mayor Barber, when he said, "After the vote was passed, the Mayor issued his proclamation."

THE CONTACT which is now exciting the country between Foreigners and Native Americans, and in which the heartless demagogues and unscrupulous advocates of foreign influence and the miserable apologists of Roman intolerance are arrayed with bitter hostility against those patriotic sons of the soil who seek only to protect and preserve American institutions and American liberty, is not unparalleled in our history. The spirit of independence of American independence, there was a similar struggle between the friends of liberty and the advocates and hirelings of foreign despotism.

In those "days which tried men's souls," as in these times when true patriots and good men are seeking to renounce and arope to life like activity in the spirit of Americanism, the patriots were disengaged, without stint, by the organization of the American party, they were called rebels and rebels; the violent epithets were applied to them; they were proscribed and abominated with a rancor and violence equal to that of the hostility of the Anti-Americanists against the native-born members of the American party at this time. The patriots of those days were compelled to meet in secret, to avoid the eyes of every one, to meet in the darkness of the night, and to take together solemn oaths, devoting their lives, their property, and their sacred honor to the glorious cause of American freedom. They, as now, in some instances affected to despise their efforts, loudly proclaimed the weakness of the American party, and that its principles were of no value. The Foreign party, with arms in their hearts, ruthlessly attacked unarmed patriots, recklessly and deliberately shed the first American blood, and thought thus to "erupt out republicanism" from the souls and hearts of the people. The Foreign party now, as then, has been spoken of in terms of contempt by its opponents, and its strength has been ridiculed.

THE AMERICAN party, the Washington Star makes mention of a rumor prevalent there, that the Hon. Wm. Preston is to be treacherously appointed Minister of Exterior Affairs. England. We should be gratified to see the appointment made. Col. P. would be a worthy representative of his country at any court.

COT. PRACTON.—The Washington Star makes mention of a rumor prevalent there, that the Hon. Wm. Preston is to be treacherously appointed Minister of Exterior Affairs. England. We should be gratified to see the appointment made. Col. P. would be a worthy representative of his country at any court.

THE PUBLIC VERDICT.—On Saturday morning, we gave brief extract's from about thirty newspapers upon the subject of the late riots in Louisville, and the trials of the leaders of the Loyalists and Nativists, extracted from the *Evening Bulletin* and *Tele-Weekly Journal*. The trials will be given in full in our next number.

HANGING POTATOES.—There are few operations upon the farm more laborious than digging potatoes. The inventor of an implement with which this labor can be abridged may truly be considered a benefactor. An implement has lately been introduced and is advertised for sale at the store of Bryant, Pitkin, & Co., Main street, by which the labor of digging potatoes is reduced to a minimum. The use of the machine, however, is a matter of no small expense. When the value of this plan becomes known it cannot fail to come into general use.
